

Eco Glass Filter Media - the green & cost effective filter media

Eco Glass Filter Media (EGFM) is the environmentally friendly filter media and a viable alternative to sand; made from glass recycled in the UK, it doesn't involve intrusive mining and the use of scarce resources.

Key Benefits:

- **EGFM is more efficient**

It can remove up to 30% more material and pollutants than sand, so saving on backwashing and the resultant water, energy and chemical treatment costs

- **EGFM keeps cleaner**

It's less susceptible to bio-fouling, as the product is heat treated surfaces are smooth, so requiring less remedial action and again less chemical treatment to kill pollutants

- **EGFM requires less material**

It's less dense than sand, requiring 15% less media to fill the equivalent filter

- **EGFM doesn't degrade**

It therefore has a longer life span

- **EGFM is suitable**

It is suitable for commercial and residential filters with laterals or nozzle plates.

- **EGFM is available in three grades**

The media comes in Grade 1, Grade 2 and Grade 3. All grades are milled down to remove sharp points and is packed in 25kg bags.

- Grade 1 is equivalent to 16/30 grade sand

- Grade 2 is equivalent to 8/16 grade sand

- Grade 3 is equivalent to 6mm gravel

Grade 1 - equivalent to 16/30 grade sand

Grade 2 - equivalent to 8/16 grade sand

Grade 3 - equivalent to 6mm gravel

Eco Glass Filter Media

Cat	Code	Description
D	FMEG1/25	Grade 1 EGFM - 25kg bag
D	FMEG2/25	Grade 2 EGFM - 25kg bag
D	FMEG3/25	Grade 3 EGFM - 25kg bag
